ROLYN C. DAGUIL, PHD
President
Caraga State University - Main Campus
Ampayon, Butuan City, Philippines

Dear Dr. Daguil:

Greetings!

I am writing to apply for the position of Junior Software Developer at Caraga State University, which I saw posted on the university's official Facebook page. As a fresh graduate of Bachelor of Science in Information Technology, I believe my education and skills make me a good fit for this role.

I completed my BSIT degree at Caraga State University in 2029, graduating Cum Laude and receiving recognition as a Dean's Lister. Throughout the program, I gained a solid foundation in programming, database management, and software development. I worked on several academic projects that allowed me to apply what I learned, including a Student Information Management System, an Online Coffee Shop Ordering System, and a Gym Membership and Facility Management Database. These projects helped me practice designing systems from start to finish, from planning the database structure to building a working interface. I was also an active member of our IT student organization, where I took part in programming workshops and collaborated with classmates on student software project teams.

In terms of technical skills, I am proficient in Java, C, SQL, HTML, CSS, and JavaScript, along with object-oriented programming, database management, and version control using Git and GitHub. I am also familiar with basic UI/UX principles and comfortable with debugging and troubleshooting code. Beyond technical ability, I consider myself a strong problem solver with logical thinking skills, and I work well in a team setting. I am adaptable, detail-oriented, and manage my time well, and I am always eager to learn new tools and technologies to grow as a developer.

I would welcome the opportunity to discuss how my background and skills can contribute to your team. Thank you for considering my application, and I look forward to the possibility of an interview at your convenience.

Very respectfully yours,

GABRIEL PICATO
